2. User entering a movie in English

Success + Fails End

Condition

User able/not to submit a movie

Trigger

User clicks on "Submit a Movie"

User Stories

User stories are short, simple description of a feature told from the perspective of the person who desires the new capability, usually a user or customer of the system. They typically follow a simple template:

As a <type of user>, I want <some goal> so that <some reason>.

1. As a film buff:
 - a. I want to see information about a movie
 - b. I want to enter a new movie in your database
 - c. I want to see a map of where movies have been produced

2. As a person interested in women in film:
 - a. I want to see movies that pass the Bechdel Test
 - b. I want to condemn movies that do not pass the Bechdel Test
 - c. I want to see a map of where movies who pass and do not pass are produced
3. As a film reviewer:
 - a. I want to vote if a movie passes the Bechdel test or not
 - b. I want to comment on the movie to explain who it does/not pass
